Profitable and Marketable

- Heterozygous black, DNA tested homozygous polled
- A leader for API (top 2%) combining outstanding calving ease, maternal calving ease, sensible growth and strong carcass traits
- The overall look and kind of his progeny make them extremely popular and easy to sell
- The best return on investment for your semen dollar

Interpreting an EPD

Sire X has a weaning weight EPD of +20.

Relative to the average animal born in a designated year , sire X is superior to that average animal by 20 pounds.

What is the value of that?
