Animal Breeding – selection of dog breeds

What is Biotechnology ?

Biotechnology - The application of science and engineering to living organisms.

Animal biotechnology

- Artificial selection (breeding programs)
How do farmers make their selection decisions – which bull to use?

Feet & Pasterns	0.1	PE					
Femininity	0	PE					
Udder Attachment		PE					
Udder Depth		PE					
Teat Size		PE					

Comments: Pedigree Estimate

Profitable and Marketable

- Heterozygous black, DNA tested homozygous polled
- A leader for API (top 2%) combining outstanding calving ease, maternal calving ease, sensible growth and strong carcass traits
- The overall look and kind of his progeny make them extremely popular and easy to sell
- The best return on investment for your semen dollar

AMERICAN SIMMENTAL SIRE SUMMARY FALL 2007

TRAIT	CED	BW	WW	YW	MCE	MILK	MWW	STAY
EPD	+15.7	-0.9	+35.3	+58.6	+13.3	+6.9	+24.5	+16.3

Animal biotechnology

- Artificial selection (breeding programs)
- Artificial Insemination

- **Cloning**
- **Genetic engineering**

Have I ever eaten a clone?

YES

What is a clone ?

- Cloning, in horticulture and biology, any organism whose genetic information is identical to that of a "mother organism" from which it was created.
- Food from clones has been a part of our diet for years. Many common fruits (e.g., pears, apples, oranges and lemons) and several vegetables (e.g., potatoes and truffles) are clones.

What about cloned animals?

Cloning by "natural reproduction" (monozygotic twins)

Cloning by embryo splitting – has been done for 20 years

Cloning by Embryo Splitting

Embryo is split to form two half-embryos

Embryos are transferred to an unrelated surrogate mother

Pregnancy is monitored by ultrasound

Sheep gives birth to identical twins

Dolly the first adult cell cloned (1996)

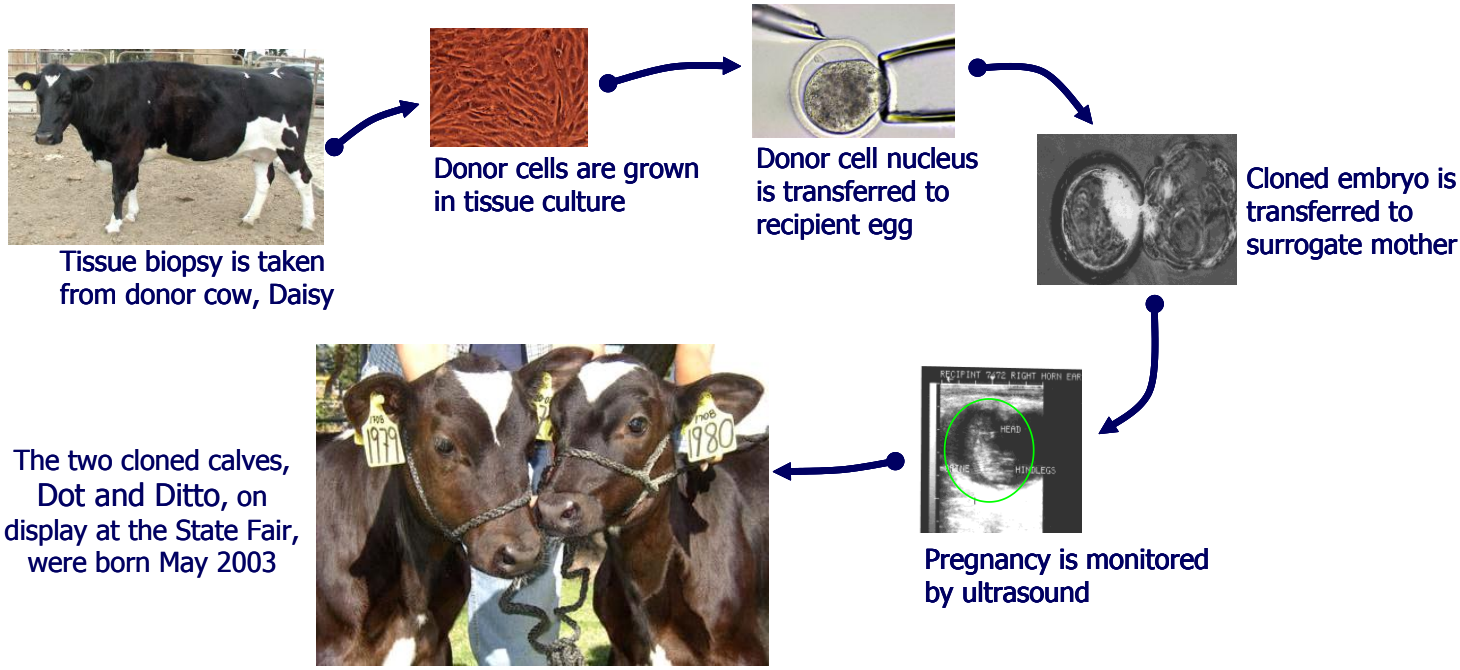

Cloning by "Nuclear Transfer" (take nucleus and transfer it)

Embryo Transfer Laboratory

Cloning by Nuclear Transfer at UCDAVIS

Many animal species have been since been cloned from adult cells

Who's Buying?

\$20,000

Regancrest Emory Derry died unexpectedly.

Who's Buying?

- **Full Flush**

Unable to supply market demand for his semen

Who's Buying?

Specialty Cattle Producers

Starlight: record 77 inches 'tip to tip'

What's up in the blogosphere ?

- **Posted by Christina**

“Will cloned food sources be labeled as such? I am certainly not in support of it, will avoid it and will continue to support organic food sources as much as possible. What are our leaders thinking and why, as a US Citizen and registered voter, don't I get a say in this? Very disturbing!”

- **Posted by Quignoff**

“There are many people that obviously do not know that we eat cloned, genetically engineered foods every single day. Nearly all of the plant foods that we eat have been engineered. Besides, our bodies have no idea that the food it's eating is cloned or not; dna is dna is dna as far as our stomachs and the microbes that live there are concerned.”

- **Posted by Troy**

“Why not? Dead cow is dead cow regardless of its possible parentage.”

Shift gears to Genetic Engineering

What is DNA ?

PROTEINS ARE THE BUILDING BLOCKS OF LIFE AND COLLECTIVELY ACT TO DETERMINE PHENOTYPE

**FIVE
QUESTIONS**

10

20

30

40

50

ANSWER 1

**It is the application of
science and engineering to
living organisms**

QUESTION 1

What is biotechnology ?

ANSWER 2

It is the dairy cow

QUESTION 2

What is the black and white cow (Holstein breed) ?

ANSWER 3

It is the process of making a genetically identical copy of an individual.

QUESTION 3

What is cloning ?

ANSWER 4

**It is the name for all of the
DNA in each cell of an
organism.**

QUESTION 4

What is the genome ?

ANSWER 5

She was the first animal cloned from an adult cell.

QUESTION 5

Who was Dolly (the sheep) ?

FINAL JEOPARDY

It is a linear molecule that is shaped like a double helix and it is made up of pairs of nucleotides

FINAL JEOPARDY

What is DNA ?
